RefWorks Announces Linking Partnership with Serials Solutions and WebFeat

Enabling the direct export from federated search engines into RefWorks

BETHESDA, MD, USA (March 29, 2007) – RefWorks, LLC, the leading provider of web-based research management, writing and collaboration service for the academic and research communities, has partnered with Serials Solutions and WebFeat to provide a direct export from their respected federated platforms to RefWorks. This new integration will allow users from both Central Search and WebFeat to export search results directly into a RefWorks account with the simple click of a button. Because users of these leading federated search engines can simultaneously search across unlimited numbers of resources, the direct export link expedites the research workflow process tremendously, automatically transferring data from one service to another seamlessly.

“We are very pleased that WebFeat and our partner, Serials Solutions, have joined with RefWorks to make this powerful capability available to our clients,” noted Todd Miller, President, WebFeat. “The seamless export to RefWorks is a great addition to Central Search, especially when combined with our Results Clustering feature. These export tools provide researchers and students the ability to find and save high quality citations quickly and easily,” noted J.R. Jenkins, Group Product Manager, Serials Solutions. “We are so pleased to be able to now include two of the leading federated search products in our portfolio of linking partners. Our ability to develop these seamless direct export links, quite rapidly, with numerous products and platforms continues to play an important role in the development of our product. Providing our end-users with an accurate, yet simple and easy way to get their search results from these services into their RefWorks database is a fundamental feature”, noted Tina Long Moir, Vice President of Business Development, Sales and Marketing, RefWorks LLC.

About RefWorks

RefWorks is an international company that provides research management solutions, helping researchers become more effective in their work by aiding in the management, organization, collaboration, and dissemination of research information. Thousands of researchers in over 800 institutions globally use RefWorks daily. Founded in 2001 by a team of experts in the field of bibliography database management, RefWorks supports hundreds of online databases and output styles covering a broad range of subject areas. RefWorks collaborates with some of the world's most prestigious online information service providers including ProQuest CSA, BioOne, EBSCO, Elsevier, HighWire, H.W. Wilson, ISI, OCLC, and Ovid, to name a few.
