New Bibliography Tool Added to the CSA Illumina Interface

BETHESDA, Maryland, USA (15 July 2004) -- Researchers using the CSA Illumina interface can now use the new QuikBib tool, developed by RefWorks, to easily generate a bibliography from their search results. QuikBib takes search results from bibliographic databases and formats the citation information into bibliographies. Moreover, QuikBib gives the user a choice of a number of different bibliographic styles and output options.

“Users who don’t already have a bibliographic management tool in place will find QuikBib invaluable,” said Matt Dunie, president of CSA. “It is another example of the way we constantly respond to user feedback to improve and add value to the CSA Illumina platform.”

The QuikBib tool was developed in conjunction with RefWorks, who offer their own complete Web-based bibliographic management tool. The QuikBib service was added to the CSA Illumina interface in early June, and it is available to subscribers at no additional cost.

QuikBib allows users to generate bibliographies in the following styles:

- **AMA** – American Medical Association, 9th Edition
- **APA**- American Psychological Association, 5th Edition
- **APA, Annotated with Abstracts** -- American Psychological Association, 5th Edition
- **Chicago**, 15th Edition (Author-Date System)
- **MLA**, 6th Edition
- **MLA**, 6th Edition -- with subscriber information
- **Turabian** (Reference List), 6th Edition
- **Uniform** – Uniform Requirements for Manuscripts Submitted to Biomedical Journals

RefWorks was founded by a team of experts in the field of bibliographic database management. They are dedicated to providing a high quality, yet affordably priced product for the academic, government, and corporate communities. RefWorks supports over 460 online databases covering a broad range of subject areas. The collection is compatible with some of the world's most prestigious services, including CSA, BioOne, EBSCO, Scopus, ISI Web of Science, OCLC, and ProQuest, to name a few. A full list of the services and specific databases covered, along with other product information, can be found at the RefWorks Web site (<http://www.refworks.com/>).

For more information on RefWorks, please link to www.RefWorks.com or contact Tina Long Moir, Vice President, RefWorks Business Development, Sales and Marketing at tmoir@csa.com.
